Fitness apps **lose people.**

Motivation dies alone, and the tools are either dumb or expensive.

- **80%+ quit** — solo trackers are lonely and generic.
- Two broken choices: **dumb loggers** (MyFitnessPal) or **expensive human coaches**.
- People actually want a **specific look**, a plan that **adapts**, and **accountability**.

Goal + AI Coach + Community — in one app.

AIM**Pick your look**

Choose the physique you want; the app builds adaptive workouts and AI meal plans toward it.
